COMPANY PROFILE

Salaam's General Profile

Mission - To be at the forefront of securing digital networks for our clients through differentiated products and services that ensures a safer and a secure cyberspace

Vision - To provide the best in class service.

Philosophy - As a firm, we always take up clients who we are sure to provide the best in class service. We always ensure we go above and beyond our service targets which remains our DNA. We let our work speak for ourselves and we focus on what we are great at before expanding our service offering.

Salaam
Technology Limited

Safeguarding your ICT investments

In the information age, everyone is going digital as organizations want to tap into the vast potential of technology to power innovation and enable stronger connections with existing and prospective customers.
This however can come in with various challenges which includes:
- The expanding cybercrime and cyberthreat landscape,
- Increasing regulatory scrutiny
- Digital literacy on emerging technologies
- Increasing reliance with third parties
- Increasing insider frauds
- Increasing challenges with data privacy and security

We at Salaam are a team of dynamic, enthusiastic, skilled and certified information assurance professionals. With the right mix of experience, investment in technology, cutting edge methodology, we are a partner that you can always rely on.

Salaam
Technology Limited

Salaam's Services Offering

Salaam 24/7

We provide 24/7 continuous monitoring to your network and systems for fraud and cyber attacks. We offer real-time **monitoring**, proactive **prevention**, efficient **management**, prompt **detection**, and quick **response** to cybersecurity incidents of various complexity

Salaam Assurance

An independent audit on IT governance, access to programs and data, computer operations and interfaces. We provide assurance before you carry out any major systems changes or immediately thereafter or even through an annual compliance cycle.

Salaam CyberSecurity testing - VAPT

We test your security posture through vulnerability assessment and penetration testing.
We simulate the actions of a malicious intruder to your systems to ensure that all loopholes are sealed.

Salaam
Awareness

We provide training and awareness on various emerging areas on IT such as Cybersecurity, digital forensics among others.
We have partnered with the leading providers of this platform such as KnowBe4, PECB and others.

Salaam
Salaam Analytics

We have the expertise in analyzing complex data to aid in decision making. We use daily, weekly and monthly analytical monitoring to determine patterns so that you can tell us what you are doing well, determining how we can do it better and recognizing problems before they can result in material damage.

Why Salaam Technology?

30+ years of combined experience in cybersecurity, digital forensics, ICT audit, data analytics and project management.
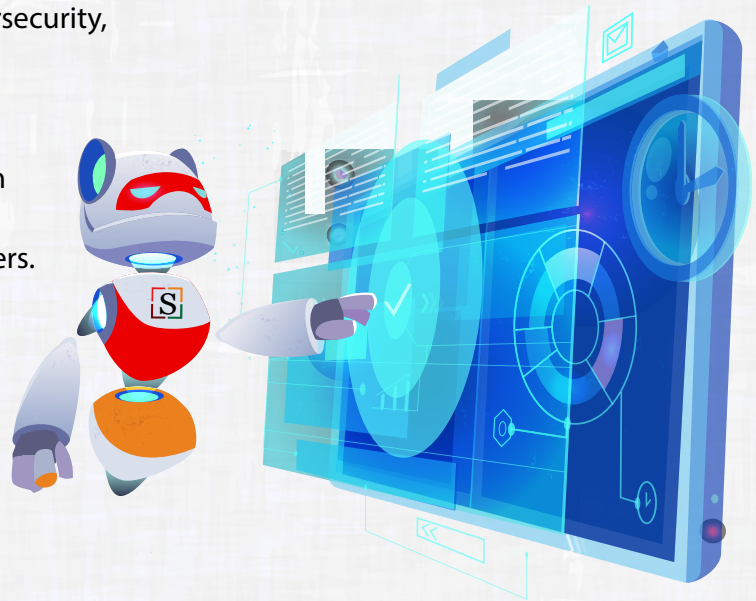

50+ clients served since 2018, ranging from SACCOs, Banks, Microfinance institutions, government agencies, non-profits, among others.

14+ differentiated services that secure your company's ICT investments and ensure you get value from them.

5 Strategic partners, that complements our expertise and gives us competitive advantage in our service offering.

99.99% client satisfaction rate.

100% absolute focus and passion in what we do!
